

Conflict Minerals Policy

Even if SmarDTV Global SAS is not legally bound by European regulation related to conflict minerals and does not directly purchase conflict minerals, SmarDTV Global SAS has voluntarily decided to respect the main principles resulting from such regulation.

Consequently, SmarDTV Global SAS fully supports the policy of avoiding the use of 3TG minerals mined in the DRC and neighboring areas, unless those minerals are from conflict-free sources. SmarDTV Global SAS has implemented a process for obtaining chain of declarations from all its suppliers that utilize 3TG minerals in their supply chain.

In addition, suppliers are:

- asked to source 3TG minerals from socially responsible suppliers who obtain their raw materials from conflict free sources;
- required to accurately report their suppliers of 3TG minerals and smelters/refiners for 3TG minerals to SmarDTV Global SAS upon request; and
- expected to comply with all applicable regulations and rules regarding conflict minerals.
